

DengueRadar: sample rows from each dataset

All data from data.gov.sg (NEA, MOH, MSS, SingStat, URA). Samples pulled 28 Sep 2026. Datasets 1-4 answer **when** a wave is coming; datasets 5-8 answer **where**, and which seniors.

1. Weekly dengue cases (MOH Weekly Infectious Disease Bulletin): the forecast target

d_ca168b2cb763640d72c4600a68f9909e · 20,070 rows · 2012-2022 · national only

epi_week	disease	no._of_cases
2021-W31	Dengue Fever	70
2021-W31	Dengue Haemorrhagic Fever	0
2021-W32	Dengue Fever	81
2021-W32	Dengue Haemorrhagic Fever	0

- One row = one disease in one week. There are 46 diseases: keep the two dengue rows and add them together.
- Watch out: 2014 and 2020 have a week 53 (e.g. 2014-W53), which standard ISO date parsing does not handle.

2. Monthly climate (temperature, rain, humidity): weather features

d_1744ca68dc7ed37221b17c441042405e · 10 rows x 620 columns · 1975 to Jul 2026

DataSeries	2026Jul	2026Jun	2026May	2026Apr	2026Mar
Air Temperature Means Daily Maximum	32.0	32.1	32.4	33.2	32.7
Air Temperature Means Daily Minimum	26.7	26.2	26.0	26.4	25.6
Total Rainfall	112.4	178.0	185.2	179.8	38.2
Number Of Rainy Days	12.0	14.0	19.0	15.0	5.0
24 Hours Mean Relative Humidity	80.2	81.7	83.3	81.3	78.9

- It is 'wide': each month is a column. Transpose it so each month becomes a row.

3. Historical station rainfall and air temperature (2016-2024): station-level weather

One dataset per year · 2020 rainfall d_9e7de44094f876f6804b8b5bcee45c81 = 6,334,473 rows · 2020 temperature d_10d453bc02d1a41daf6373b96b1929e4 = 8,159,209 rows

date	timestamp	station_id	station_name	lat, lon	reading_value	reading_type	reading_unit
2020-01-01	2020-01-01T00:00:00+08:00	S105	Admiralty Road West	1.45817, 103.79525	0.0	TB1 Rainfall 5 Minute Total F	mm
2020-01-01	2020-01-01T00:00:00+08:00	S77	Alexandra Road	1.2937, 103.8125	0.0	TB1 Rainfall 5 Minute Total F	mm
2020-01-01	2020-01-01T00:00:00+08:00	S109	Ang Mo Kio Avenue 5	1.3764, 103.8492	0.0	TB1 Rainfall 5 Minute Total F	mm
2020-01-01	2020-01-01T00:00:00+08:00	S117	Banyan Road	1.256, 103.679	0.0	TB1 Rainfall 5 Minute Total F	mm
2020-01-01	2020-01-01T00:00:00+08:00	S109	Ang Mo Kio Avenue 5	1.3764, 103.8492	26.3	DBT 1M F	deg C
2020-01-01	2020-01-01T00:00:00+08:00	S117	Banyan Road	1.256, 103.679	27.3	DBT 1M F	deg C

- A reading every 5 minutes (rain) or every minute (temperature) at every station.
- Too big to use raw on Free Edition: add it up to daily or weekly totals per station first.

4. Live weather APIs (real-time)

api-open.data.gov.sg/v2/real-time/api/rainfall and /air-temperature · updated every few minutes

API	stations	reading time	station	lat, lon	value
Rainfall	89	2026-09-28T10:25:00+08:00	S218 Bukit Batok Street 34	1.36491, 103.75065	0 mm
Rainfall	89	2026-09-28T10:25:00+08:00	S219 Yio Chu Kang Road	1.37998, 103.87639	0 mm
Air temperature	18	2026-09-28T10:33:00+08:00	S109 Ang Mo Kio Avenue 5	1.3793, 103.85	28.5 deg C
Air temperature	18	2026-09-28T10:33:00+08:00	S106 Jalan Noordin (Pulau Ubin)	1.4168, 103.9673	28.8 deg C

- Use these for the live demo; use dataset 3 to train, because the APIs only return recent readings.

5. NEA live dengue clusters: Level 2 'where'

d_dbfabf16158d1b0e1c420627c0819168 · 11 clusters on 24 Sep 2026 · GeoJSON (each row comes with a map shape)

LOCALITY	CASE_SIZE	FMEL_UPD_D	geometry
Canberra Rd (Blk 308) / Sembawang Dr / Sembawang Dr (Blk 312) / Sembawang Vista (Blk 318)	4	20260924154240	Polygon
Old Choa Chu Kang Rd	3	20260924154240	Polygon
Soon Lee Rd	4	20260924154240	Polygon
Bishan St 12 (Blk 109, 110, 111, 115, 116, 118)	8	20260924154240	Polygon

- Only shows today. Yesterday's version is overwritten, which is why the daily snapshot job matters.
- FMEL_UPD_D is the last-updated time, written as YYYYMMDDhhmmss.

6. Census 2020: residents by subzone and age, for the senior weighting

d_d95ae740c0f8961a0b10435836660ce0 · 388 rows x 61 columns (6 of them shown)

Number	Total_Total	Total_0_4	Total_65_69	Total_70_74	Total_90andOver
Ang Mo Kio - Total	162280	5280	11960	9930	1130
Ang Mo Kio Town Centre	4810	170	250	230	20
Cheng San	28070	1060	2170	1730	180
Yio Chu Kang	20	-	-	-	-
Yio Chu Kang North	-	-	-	-	-

- Rows mix planning areas and subzones: rows ending in '- Total' are planning areas, the rest are subzones.
- Every column is text, because empty cells are written as '-' (see Yio Chu Kang North): replace '-' with 0, then convert to numbers.
- Residents 65+ = add the columns from Total_65_69 to Total_90andOver.

7. Residents aged 65+ by living arrangement: problem sizing

d_45acf574880ac493ec638f72338e62d5 · 42 rows · 2010-2025 · national only (no area breakdown)

DataSeries	2025	2024	2023
Total	768800	767900	708700
Living With Spouse & At Least One Child In Household	272100	271800	243700
Living With Spouse, No Children In Household	222800	208600	197000
Living With Children But Without Spouse In Household	119900	132000	135800
Living In One-Person Household	88400	87200	78100
Living With Only Domestic Worker(s) In Household	18300	18700	12000
Others	47300	49700	42100

- Because there is no area breakdown, this sizes the problem on slide 1 but cannot feed an area score.

8. Map boundaries (URA Master Plan 2019)

Subzones d_8594ae9ff96d0c708bc2af633048edfb · Planning areas d_4765db0e87b9c86336792efe8a1f7a66

file	SUBZONE_N	SUBZONE_C	PLN_AREA_N	PLN_AREA_C	REGION_N	geometry
Subzones (332 shapes)	DEPOT ROAD	BMSZ12	BUKIT MERAH		CENTRAL REGION	Polygon
Subzones (332 shapes)	BUKIT MERAH	BMSZ02	BUKIT MERAH		CENTRAL REGION	Polygon
Planning areas (55 shapes)			BEDOK	BD	EAST REGION	Polygon
Planning areas (55 shapes)			BOON LAY	BL	WEST REGION	Polygon

- These link the other datasets: a cluster's shape falls inside a subzone, and SUBZONE_N matches the census 'Number' column (after upper-casing).
